Joseph Shen, M.D.

Dear Joe:

It is my pleasure to write about my continuing and fortunate use of the product, which you have made available to us: The 3DMP EKG. It has proven of great benefit with regard to not only diagnoses but also reassurance. It is the uncanny ability of the 3DMP EKG to reveal safety as well as danger, predisposition to arrhythmias. It is second only to a coronary angiogram or an electrophysiology study in terms of its prognostic ability. I would like to thank you for making this very well-designed, easy to use machine available to me and my patients. We will continue to use it on a virtually daily basis as we have. Finally, the backup of Premier Heart in assisting with prompt interpretation of these reports has proven wonderfully beneficial. If I may do anything to support your continuing efforts or discuss with those who may be interested in either purchasing or evaluating this machine, please do not hesitate to call upon me.

Sincerely,

H. Robert Silverstein, M.D., F.A.C.C.
